

The 16th Korea-China-Japan International Jellyfish Workshop

INVITATION

Recently, large numbers of jellyfish are occurring in the seacoasts around the world including Korea.

The mass jellyfish appearances are connecting to increase of social and economic damage, including damage to fisheries and the jellyfish stinging swimmers at the beaches. Conscious of this fact, governments, especially fisheries institutes of the Korea, China, and Japan are working together since 2004 to identify the causes and establish strategies to cope with the mass appearance of the jellyfish.

In this 16th International Jellyfish Workshop, the jellyfish experts will share the research results, exchange information, and will have a discuss on them. It will strengthen our knowledge and permit the governments to establish preventive strategies against jellyfish. I sincerely invite you all to this workshop that will yield the fruitful results and it will serve as a good foundation establishment for making our strategies regarding mass appearance of jellyfish and its impact on marine ecosystem.

December, 2019

CHOI, Wan-Hyun

President, National Institute of Fisheries Science

SCHEDULE

3 Dec.

- 10:00~10:30 Registration
- 10:30~11:00 Opening Speeches
- 11:00~12:00 Review on the Jellyfish Studies in 2019
- 12:00~13:30 Lunch
- 13:30~16:30 Session I.
Nemopilema nomurai monitoring 1.
- 16:30~17:30 Session II.
Jellyfish Eco-Physiological Studies 1.

4 Dec.

- 9:30~12:10 Session III.
Nemopilema nomurai monitoring 2.
- 12:10~13:30 Lunch
- 13:30~16:10 Session IV.
Jellyfish Eco-Physiological Studies 2.
- 16:10~17:00 Discussion
- 17:00~17:10 Closing Session
